

# Computer Vision for Early Childhood Behavioral Disorders

Joshua Fasching, Nicholas Walczak, Ravishankar Sivalingam,  
Kathryn Cullen, Barbara Murphy, Guillermo Sapiro,  
Vassilios Morellas, Nikos Papanikolopoulos

University of Minnesota

MnDrive Kickoff Event

April 17, 2014

## Current System

- Installed at the Shirley G. Moore Lab School
- Multiple RGB+D sensors deployed around a real world classroom environment
- Segmentation and tracking can provide subjects for further analysis

Sensor1 RGB

Sensor2 RGB

Sensor3 RGB

Sensor4 RGB

3D reconstruction of scene

Tracking

## What risk markers to focus on?

### Motor Stereotypies

- *Definition:* Purposeless, Rhythmical repetitive [motor] movements ( Goldman et. al 2008 )
- Associated with Autism, Rett Syndrome, and other developmental disabilities
- Observed in both developmentally impaired and normal children but decrease rapidly in the normal case
